

**7**

You cannot tell the depth of a hole if it is full of water.

**8**

Do not play near the edge of a riverbank as it might crumble away suddenly.

**9**

Do not retrieve model boats by wading in.

**10**

Never walk on ice-covered waterways.

# Water Safety on the Farm

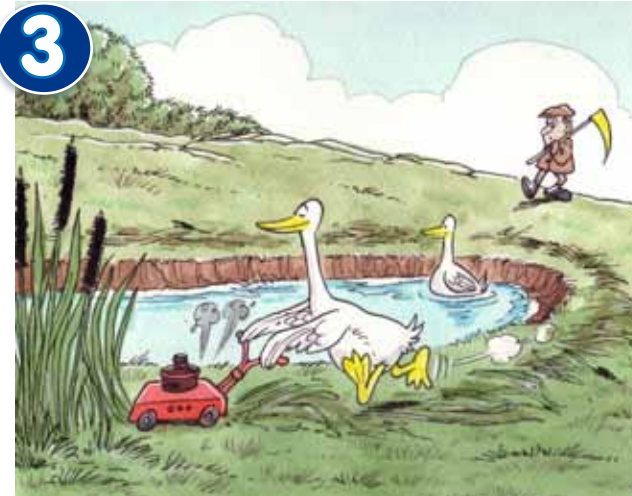

# Water Safety on the Farm

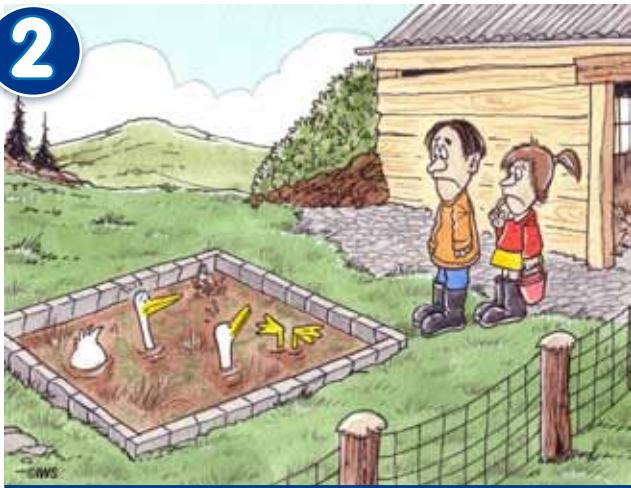

**1** Ponds on farms are often out of view of the house so always have an adult with you when you are feeding ducks or playing.

**3** Reeds and grass often obscure the edge of the pond

**5** Holes or drains left exposed after farm building work should be closed.

**2** Slurry pits are not solid enough to stand on. Keep well away as you would quickly sink.

**4** The banks of a pond may be weak and could give way under your weight.

**6** Be cautious riding horses near and into water.

**Be water-wise on the farm by learning these simple safety steps**
